

Technical Words

With this project, we aim teaching our students technical words used in thier fields of vocational education while having fun!

Aims

We are a vocational high school from İstanbul, Türkiye. We have a prep class this year and we would like our students to learn technical words as well as daily English words. By this way, they will be able to read technical documents which are mostly in English, understand videos on technical subjects and they will be able to search projects or other information on the net easily.

Expected Results

All of the procedures of the project will be displayed on twinspace. The partner schools will share the outcomes on their websites. The applications prepared on different platforms will be open to public and everyone will be able to reach and use them.

Participants:

Nursel Ak- Handan Hayrettin Yelkikanat MTAL
